SEMESTER PROJECT :
BUILDING A WEBSITE

GROUP MEMBERS:

HUDA JAVED – 230483 (Leader)

DANIA NOOR – 230463

FATIMA AKHTAR - 230443

PROJECT IDEA:

We chose to create a cosmetics website as our project. This project offers benefits to users by providing them with engaging platform to discover, explore and purchase beauty products. This projects allows us to apply both creative and technical skills while addressing a practical need in the online shopping space.

Pros:

1. *Creativity Showcase*: Allows you to showcase your design skills by creating an aesthetically pleasing cosmetics website.
2. *Technical Skill Development*: Enhances your coding skills using HTML, CSS, and JavaScript.
3. *Portfolio Addition*: Acts as a valuable piece in your portfolio, demonstrating both design and development capabilities.
4. *Practical Application*: Addresses a real-world need for users interested in cosmetics, making it a practical and relevant project.

Cons:

1. *Time-Consuming*: Developing a fully functional cosmetics website can be time-consuming.
2. *Content Requirement*: Creating compelling product content and imagery may pose a challenge.
3. *Competitive* : The cosmetics market online is competitive, making it challenging to stand out.
4. *Learning Curve*: If you're new to certain technologies or features, there might be a learning curve.
